

Neck Rejuvenation Packages

The neck is an aesthetically important area and can prove as telling as the backs of hands in revealing one's age. The neck is subject to many degenerative changes such as loss of collagen and elastin, accumulation of fat, and exposure and chemicals, such a perfume and some cleaning solutions. The neck and the décolletage area are particularly prone to premature ageing because these are areas of increased sun exposure.

<p><u>Package A</u> 1 Microdermabrasion 2 Limelight Treatments</p>
